SUGGESTED FIGURE FOR PUBLICATION AND
REQUEST TO CORRECT A MISPRINT**Honorable Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This paper is filed to submit a suggested figure for publication on the patent front page and to request a correction of a misprint in the patent specification. The present patent application was allowed and the issue fees are being submitted under a separate filing.

The Applicant respectfully suggests that Figure 1 will be published on the patent front page.

Application No. 10/796,468
Amendment after allowance

The Applicant further respectfully requests a correction of a misprint in the patent specification. On page 4 of the specification, under DETAILED DESCRIPTION OF THE INVENTION, line 26 reads:

the grug deliver was unsuccessful.

This line contains two misprints and should read:

the ~~grug deliver~~ drug delivery was unsuccessful.

This is a purely grammatical error. No new matter is introduced by this correction. The Applicant has attached a marked up corrected page 4 of the specification.

Respectfully submitted:
